Bibliography of Australian Electricity Industry History and Heritage Materials

Compiled by Dr MacLaren North, Futurepast Heritage Consulting P/L

This bibliography represents a list of materials relating to the history and heritage of the electricity industry. It is primarily material related to NSW and Australia, with a small number of New Zealand, UK and USA references. General references on the history of electricity are not included.

This bibliography was originally compiled in 2007 for the preparation of the EnergyAustralia Section 170 Heritage and Conservation Register and the associated Thematic History.

The bibliography has not been updated since that time but is provided here as a resource for other researchers.

Materials identified in this bibliography are available through institutional libraries and have primarily been identified in the collection of EnergyAustralia and the State Library of NSW.

To search for any of these items across Australia, see the Libraries Australia website:

http://librariesaustralia.nla.gov.au/

The key texts relating to EnergyAustralia's history are:

- Anderson, Gordon F (1955) *Fifty years of Electricity Supply: The story of Sydney's Electricity Undertaking*. Sydney: The Sydney County Council.
- Armstrong, Peter (2002) *From Council to Corporation: the History of Newcastle's Electricity Supply*. [Newcastle, N.S.W.?]: P. Armstrong.
